Profile

Hi, I'm Kanthimathi — a budding Full Stack Python Developer with a passion for building web applications that are both functional and user-friendly. Though I'm just starting out professionally, I have already built several projects that showcase my ability to develop full-stack applications from the ground up.

I specialize in Python-based web development, using technologies like Python, Django, Flask on the backend, and HTML, CSS, JavaScript on the frontend. I'm also familiar with working with SQLite, PostgreSQL, and version control systems like Git.

I'm constantly learning and improving my skills by building projects, contributing to open-source, and staying up to date with industry trends. My goal is to write clean, maintainable code and create solutions that make a difference.

Education

B.E, Arunai Engineering College, Tiruvannamalai

JUNE 2008
